DETAILED ACTION

Continued Prosecution Application

1. The request filed on June 1, 2004, for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 10/027,238 is acceptable and a RCE has been established. An action on the RCE follows.

Claim Objections

2. Claims 16 and 25 are objected to because of the following informalities: claim 25 is a duplicate of claim 16 and one of the claims is necessary to be cancelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by **Holter (5,727,832)** (see Paper No. 6).

Holter (5,727,832) discloses an end effector (5) for a robot (75), comprising a vacuum plenum having a mounting plate (10) mounted to the robot; the plate having a first surface and the second surface, the opposite of the first surface; a vacuum port (12) (see Fig. 2) located on the first surface of the plate passing through the plate wherein the vacuum port is being connected to a means for drawing vacuum or a vacuum source (not shown) (Col 3, lines 25-40); a surround (18,18,30,30) located on the second surface of the plate, the surround enveloping

the vacuum port (see Fig. 2) wherein the vacuum plenum includes the mounting plate, the port, and the vacuum source; a first gripping element (45) or blade mounted to the plate gripping element having which has a substantially smooth surface at the outside portion (see Fig. 2), and being *a stationary blade* rigidly mounted generally perpendicular to the plate (10); and a second gripping element (40) or blade *movably mounted* to the plate in spaced parallel relation opposite of the first gripping blade, the second gripping blade having a substantially smooth surface located at the outside surface (see Fig. 1), wherein the gripping blade being movably mounted generally perpendicular to the plate and wherein the first and second blade are located outboard the surround (see Fig. 4).

Re claim 15, Holter's device (5,727,832) further shows a plurality of suction cups (85,85) located on an arm (84) (see Fig. 1) and the arm is indirectly mounted to the plate and in substantial perpendicular relationship the plate, and wherein the suction cups further having means for drawing vacuum (see Fig. 1).

Allowable Subject Matter

3. Claims 16,20-22,24, and 25 are allowed. However, one of the claims 16 and 25 needs to be cancelled.

Response to Arguments

4. Applicant's arguments filed June 1, 2004 have been fully considered but they are not persuasive (see the answer to applicant's argument in the final office action. It appears that applicant mistakenly put claim 15 in the claim list.

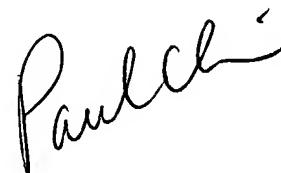

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
